

ENERGIZE YOUR BUSINESS

CONNECT WITH THE MOST RELIABLE SOLAR PANEL PROVIDER

Founded in 2006, JinkoSolar is a NYSE-listed global manufacturing leader in PV modules and energy storage. JinkoSolar serves customers across utility, C&I, and residential markets in 160 countries and is the first module supplier to deliver 100 GW, 200 GW, and 300 GW. This includes more than 28 GW in the U.S., where JinkoSolar sells award-winning EAGLE® branded products and services. JinkoSolar is an R&D leader and one of the largest solar patent holders. Vetted by labs, monitored by auditors, and favored by financiers, JinkoSolar is among the most chosen in non-recourse debt financed solar projects. JinkoSolar has one of the largest global vertically integrated supply chains, including a 6-year-old factory in Florida, which employs 600 Americans. The company is a UN Global Compact signatory, the first PV player to join the RE100, and the first PV company to have its net zero goals approved by the Science Based Targets initiative (SBTi). JinkoSolar also manages EAGLE® Preserve, a takeback and recycling stewardship program in the U.S.

**SOLAR EFFICIENCY
WORLD RECORDS**

1 out of 10 modules in the world was produced by JinkoSolar
